Adarsh Honawad

Experience:

- **Intern at ChangePay** - (December 2016 – Present)
Worked as a Front-End Android App Developer for ChangePay, an upcoming startup aimed at changing payment methods. I had to change their existing UI for the app on Android Studio and some minor changes to the backend code also.
-

Projects:

- **College Website** – Web Development (ongoing)
Am part of the team responsible for redesigning our college website. I submitted a requirements plan for the new website and am waiting for the design to start working on the website.
 - **Personal Website** – Web Development (ongoing)
I have worked on my own personal website from scratch hosted at www.adarsh2397.github.io. The website is a static website built using HTML, CSS and JavaScript frameworks.
 - **RecordBunks** – Android Development
A simple app to record bunks. This was built as a part of my project while learning Android App Development in summer after first year using Android Studio.
 - **Minesweeper** – C++ Program
A simple look-alike of the minesweeper game that was present in Windows XP. This was built using graphics.h library in C++ and Dev C++
-

Education:

- B.Tech 2nd Year: Studying – NITK Surathkal – Computer Science Engineering (3rd Semester Completed – December 2016)
 - 12th Standard CBSE – Sri Kumaran Children's Home CBSE – Passed with 96%
 - 10th Standard CBSE – Global Indian International School, Singapore – Passed with 10 GPA
-
